Subject: Revised Financial Constraint Tables

Kirk and Phillip:

I am attaching the revised Financial Constraint Project List tables (Figure 6.8 page 125 and the same table as included in the Executive Summary pg.3) that reflect the changes to the FM 2818 project. Changes are highlighted in yellow. We did this as an administrative change. Since the TxDOT Bryan District received a revised cost estimate for the FM 2818 project from Wellborn Road (FM 2154) to University Drive (FM 60) and the TIP is being amended to reflect that revision, the Metropolitan Transportation Plan must also be changed. This change can be done by staff administratively for the following reasons:

1) Since the revision didn't change project scope or limits;

- 2) The change didn't meet the two-part requirement that federal share increases by 50% and is greater than \$15,000,000;
- 3) The CSJ number is not changed;
- 4) Priority ranking and public comment on inclusion of the project was completed during the public comment period for plan adoption; and
- 5) This project funding change is being covered by TxDOT Category Four (Urban Statewide Connectivity) funds that the MPO does not control and there is no change in Category Two funding which was the sole funding source used to demonstrate financial constraint in the MTP for the 2020-2024 time band.

The Policy Board meets on the 22nd to formally adopt the TIP Amendment.

Please let me know if you have any questions or concerns.

Dan

P.S. I am working remotely so if you need to reach me call my cell at 979-587-6366. I also check my e-mail hourly.
